

# MHH PARTNER PROSPECTUS

Can you imagine providing your community an opportunity to connect with Mental health clinicians via telehealth - become a Mindhealthhub Champion?

A community model of stepped care addressing barriers to timely mental health services, at MindHealthHub we want to keep communities well and address the access gaps to early intervention support for enhanced individual mental health - locally, in community.

We are proud of our collaborative partner arrangement with Romsey Neighbourhood House (RNH) under an auspice arrangement to benefit the community of Romsey and surrounds, Victoria. RNH is a community house with a strong pulse and desire to "address service gaps" experienced by their community. The safe space at RNH enables individuals a barrier free experience to connect with Australian Telehealth clinicians with added "in house" community supports for broader wellbeing. These include volunteer opportunities, community transport services and foodbank initiatives.

**A hub that supports your connection to Mental Health Professionals via telehealth in community.**

guiding connection to mental health clinicians

If you can see a benefit in connecting individuals in your community to mental health clinicians via telehealth, connect with us and we can discuss our service packages.

It's simple, we schedule time to hear about your service, and if the fit is right we can arrange a meeting with your Committee of Management to ensure this service will not only compliment, but enhance your current services on offer at your organisation.

GUIDED CONNECTION FOR THOSE 12 YEARS & OLDER
